

**JUNE 2017**

The bi-annual reports are part of the routine reporting of the project provided the BTC obtains access to the data. They entail an updated description of the humanitarian and development projects funded by the EU and the EU MS in operation in Area C (design of the projects, purposes, geographical location, budget, size of the target population, whether ICA approved or refused them, etc.). An aggregate analysis of the geographical concentration and the sector focus is equally part of the reports. Moreover, they will include a narrative update of the incidents which occurred during the reporting period including an analysis related to the geographic and sector focus of the incidents.

In defining scope and depth of the reports, care will be taken not to become repetitive compared to OCHA reports.

BTC acts on behalf of the EU when preparing such reports. Hence the reports will be prepared by the BTC expert team for treatment and dissemination by the EU.

## AREA C DEVELOPMENT PROJECTS –JUNE 2017
